

RADIANT

TOTALLY CONNECTED™

THE ONLY INFORMATION & COMMUNICATIONS PARTNER YOUR BUSINESS NEEDS

THE ONLY INFORMATION & COMMUNICATIONS PARTNER YOUR BUSINESS NEEDS

How your business connects, shares, stores, and protects information is critical to its long-term success. Every one of your employees is constantly generating and distributing vital data. This data needs to flow quickly and securely—it needs to be backed up and stored safely. For many mid-sized companies, managing and maintaining the necessary infrastructure is a burden: it costs too much and is far too complex.

That's where Radiant comes in. It doesn't matter how many locations you have, or how much data you need to share and protect. Our wide range of products and services mean that your company can now move and manage every single megabyte easily, securely and affordably.

BIG ADVANTAGES, BIG SAVINGS

The first thing you'll notice with Radiant is how much you're saving by not having to deal with the constant staffing and training challenges of a large IT department. You'll notice you don't have to constantly upgrade obsolete server software and hardware anymore. You'll notice how much faster and reliable your connections are. And most importantly, you'll notice how much more productive everybody is when all your company data is securely backed up and easily accessible at any time.

CANADA'S BUSINESS COMMUNICATIONS EXPERT

Across Canada, businesses are recognizing Radiant's expertise in broadband communications and data management. Because we specialize in the needs of mid-sized businesses, we lead the way in solving their specific problems. We also have the largest footprint of any carrier in Canada. This combination means we can bring our clients the technology, service, communication and IT solutions that they need, but thought they couldn't afford.

EVERYTHING YOUR BUSINESS NEEDS, NOTHING IT DOESN'T

Radiant offers a wide range of products and services covering broadband connectivity, network security, cloud computing and support. Together, they'll help you totally connect, transfer and store data securely, streamline your infrastructure and save money. We'll help you identify your requirements to understand exactly what you need. Then together, we can mix-and-match to create the perfect, future-proof solution for your business. We can provide you with detailed brochures for each product separately, but for now, let's take a look at the highlights.

OUR SIZE.

THE UNFAIR ADVANTAGE.

Just like your company, Radiant isn't a giant. Our entire business is built around mid-sized companies like yours, from as few as 10 employees to as many as several thousand. So, just like you, we have to be highly focused, totally customer-centric and incredibly nimble to keep outperforming the big guys.

TAKE A LOOK AT OUR DATA.

Since we're in the business of information, let's look at a few key facts about Radiant:

- We've got the largest footprint of any Canadian carrier
- We've connected over 20,000 business locations to date
- More than 4,000 business customers
- Microsoft Gold Partner with specialization in hosting
- Fully staffed 24x7x365 technical support right here in Canada—in English & French
- Established in 1996
- A profitable, fast-growing, debt free public company
- Major offices in both Vancouver and Toronto, and on-site support technicians on call in hundreds of cities all across North America

As you can see, Radiant is big enough and strong enough to get the job done for you. But we're also small enough to personally ensure we meet your specific requirements.

TOTALLY CONNECTED

Our comprehensive range of broadband connections keeps your data flowing quickly and reliably.

BroadbandEverywhere™

We've got the largest 'on-net' footprint of any carrier in Canada—covering every province plus over 240 US metro areas. So you really do get BroadbandEverywhere with a variety of ADSL, T1, fibre and wireless options available, at the speed you need. With the added convenience of one supplier, one easy-to-understand contract, and one invoice.

SureLink™ Business Ethernet

If you need more bandwidth than ADSL, but can't get or afford optical fibre, SureLink Business Ethernet is the ideal solution. Available in select metro areas across Canada, SureLink delivers great speed and rock solid reliability at a price significantly lower than T1 or fibre.

Optical Fibre and Wireless

SureLink not available in your area? Need 10 to 100+ Mbps? No problem. Radiant also offers a range of blisteringly fast optical fibre and fixed wireless solutions in cities across North America.

TOTALLY SECURE

Whether you're connecting staff, or moving or storing data, with Radiant, you can sleep safe in the knowledge that it'll always be completely secure.

MPLS Private Networking

MPLS creates a completely private network via Radiant's own private trans-Canada backbone so your data never touches the public Internet. Controlled access is through a central firewall, flexible enough to let you enforce internal security policies, but formidable enough to keep everybody else locked out.

Secure Remote Access

Working from home? On the road? A client's office? Radiant's SSL VPN integrates seamlessly with your MPLS network, giving you full control over who can get in and what they can see and do.

TOTALLY ACCESSIBLE

With Radiant's AlwaysThere™ Enterprise Cloud computing services, all your data is universally accessible and safely backed up. Plus, we only offer Enterprise-class Private Clouds, so all your applications and data are only accessible to your employees. And, as you'd expect with AlwaysThere, they run continuously—24 hours a day, 7 days a week, 52 weeks a year.

Online Backup/Disaster Recovery

Many mid-sized businesses don't have the time or resources to do the data backup and protection that they really need. So, if a flood, fire or other disaster happens, they are totally exposed. Don't put your data at risk—have Radiant provide you with online backup and disaster recovery. With our AlwaysThere Secure Storage we automatically back up your data to our highly secure storage arrays.

Hosted Exchange

If you rely on Microsoft Exchange, how do you ensure everything is always available and expandable? With Radiant's AlwaysThere Hosted Exchange, it's easy. You just pay one low fee per user and never miss an email.

TOTALLY SUPPORTIVE

While all of Radiant's products and services are incredibly flexible and user-friendly, we absolutely understand that real people delivering real support—when you need it, where you need it—is the truly critical factor.

Mission Critical Support

Support means more than just a 24x7 tech support staff—although of course our people are there to assist you at any time night or day, in English or French. Most importantly, everything in your Radiant MPLS network or AlwaysThere service is constantly monitored. If a failure is detected, our technicians are automatically alerted to start the diagnostic process immediately.

On-site Installation & Support

Radiant's network of technicians can be on-site in less than 4 hours if you're in a Canadian or US metro—and within 24 hours almost anywhere else in North America.

Solutions Engineering

Radiant's Sales Engineers and Exchange Specialists are not just accredited—they have years of real-life experience to ensure you get exactly the services you really need.

Project Management

Rolling out a large network deployment can be a substantial challenge. Our team has the knowledge and experience to keep your large projects on track.

YOU NAME IT, WE'VE DONE IT

Radiant has over 15 years of experience helping every kind of business across Canada totally connect, transfer and protect their data. Take a look at how we can boost your business:

Retail & Hospitality

Radiant links thousands of retail locations across North America to electronic payment services, suppliers, employees, and HQs. With a wealth of retail-friendly features, our reliable, cost-effective systems can handle any type of transaction.

Financial Services

Security, reliability, speed and responsibility—we haven't compromised on any of them. Across the country, financial companies just like yours are profiting everyday from our unique AlwaysThere data services and our MPLS private networks.

Consulting, Accounting & Legal

As a consulting, accounting or legal professional, you want to be serving your clients, not managing data. So our SureLink service keeps your clients connected and our AlwaysThere servers keep all your data completely secure but always available.

Engineering & Media

If you want to move a lot of data quickly, affordably and reliably, we're the experts. Our exclusive SureLink Business Ethernet connection rips through uploads and downloads at a price that easily beats ADSL or T1 fibre, while our AlwaysThere cloud servers let you backup or share data securely wherever you are.

Manufacturing & Logistics

When every single detail of your data counts, you can trust Radiant to help you stay on top of everything. Our AlwaysThere data services link your whole company together seamlessly and securely so that everybody can do their jobs more efficiently.

Public Sector & Non-Profit

Radiant is Canadian-owned, based and staffed, which means your data stays inside Canada. We understand the importance of ensuring our reliable, customizable data services give Canadian public sector or non-profit organizations the ideal system at the ideal price.

COME AND SAY HELLO

Faster data transfer, secure data storage, reduced investment and increased productivity—why not find out how Radiant can help your business get totally connected?
